Boeing board to call for structural changes after 737 Max

...

The 737-100 and 200 are the first generation production models of the world's most successful jet airliner family, Boeing's 737 twinjet. The 737 was conceived as a short range small capacity airliner to round out the Boeing jet airliner family beneath the 727, 720 and 707.

Boeing 737-100/200 - Airliners.net

The later series 200 had broad engine pylons and the inboard leading edge flaps extended to the fuselage. The MTOW of 49,440kgs and MLW of 44,450kgs were often limiting so Boeing made structural changes to increase these weights and called the redesigned aircraft the 737-200 Advanced.

The Boeing 737 is a narrow-body aircraft produced by Boeing Commercial Airplanes at its Renton Factory in Washington. Developed to supplement the Boeing 727 on short and thin routes, the twinjet retains the 707 fuselage cross-section and nose with two underwing turbofans. Envisioned in 1964, the initial 737-100 made its first flight in April 1967 and entered service in February 1968 with Lufthansa.
