Weber has made dozens of different models of carburetors throughout the years. Unfortunately -- unlike some other brands -- many Weber carburetors are made up almost entirely of unique parts that are not used by any other model. Very few parts interchange from one model to another, and exactly zero parts were used on every Weber carburetor model.

### Amazon.com: weber carburetor

The carburetor works on Bernoulli's principle: the faster air moves, the lower its static pressure, and higher the dynamic pressure is. The throttle (accelerator) linkage does not directly control the flow of liquid fuel. Instead, it actuates carburetor mechanisms which meter the flow of air being carried into the engine.
