Air cooled chillers reject the heat absorbed from the building or process directly to the outdoor air using refrigerant to air coils and fans that blow outdoor air directly over those coils. Water cooled chillers reject the absorbed heat to an additional fluid loop that can then reject the heat through a secondary device such as a cooling tower ...

When dry or cooling operation is activated with the auto fan speed setting set to ON, the SMELL PROOF operation starts and removes stagnant odor from the indoor unit before air is discharged. Therefore, the unit does not discharge air immediately after the operation starts. Please wait for about 30 to 40 seconds. Did this solve your problem?
