Finally, a science-based relationship book. Based on social science, but science nevertheless. The constant research summaries can be a little exhausting, but Parker-Pope constantly relates the studies to real life through quizzes and a few anecdotes (sometimes it feels like she's trying a little too hard to make it "relate-able").

We will explore the psychology of our everyday thinking: why people believe weird things, how we form and change our opinions, why our expectations skew our judgments, and how we can make better decisions. We'll discuss and debate topics such as placebos, the paranormal, medicine, miracles, and more.

Hello world, this is my first blog for the Data Science community. In this blog, we are going to see the various types of transformations of data to better fit for normal distribution (Gaussian Distribution). We know that in the regression analysis the response variable should be normally distributed to get better prediction results.
