List of German military equipment of World War II - Wikipedia

World War I. Modern armoured warfare began during the First World War of 1914–1918. Strategists wanted to break the tactical, operational and strategic stalemates forced on commanders on the Western Front by the effectiveness of entrenched defensive infantry armed with machine guns—known as trench warfare. Under these conditions, attacks usually advanced very slowly and incurred massive ...

Read Online German Artillery Of World War Two

The 42 cm kurze Marinekanone 14 L/12, or Minenwerfer-Gerät, popularly known by the nickname Big Bertha, was a German siege howitzer built by Krupp AG and fielded by the Imperial German Army from 1914 to 1918. The M-Gerät had a 42-centimetre calibre barrel, making it one of the largest artillery pieces ever fielded. It was first designed in 1911 and entered production the next year. Test firing began in early 1914, and the gun was estimated to be finished by October. When World War I broke ...
