Many of the artifacts and pitfalls related to the interpretation of independent PET and CT scans are well documented, with more being reported as clinical experience grows (, 4-, 8). As mentioned earlier, however, combined PET-CT has its own unique pitfalls and artifacts (, 1,, 9,, 10). Physicians interpreting PET-CT

Pearls and Pitfalls AAA should be in the differential diagnosis for any patient over 50 with abdominal, back, or flank pain, especially those with undifferentiated shock. In a patient with a known AAA who develops acute pain, assume rupture is imminent or has already occurred. Perform a RUSH exam to attempt to establish the diagnosis.
