Thumb Proven Approach Stop Finger

We read the book, followed the goals and used "thumb gloves" (just cut the fingers out of soft winter gloves and sew around them to keep from fraying - this leaves only the thumb with a glove). We had several thumb gloves so we could wash them. The thumb gloves allowed my daughter to stop sucking her thumb for good.

For some kids, a chat with the dentist about why it's important to stop thumb sucking is more effective than a talk with mom or dad. Rarely, some doctors recommend using unpleasant techniques, such as covering your child's thumbnail with a bitter substance, bandaging the thumb or covering the hand with a sock at night.

Stops the Oral Fixation. NIPIT was designed to stop thumb sucking and finger sucking, but it really stops the oral fixation altogether. By contrast, thumb guards and finger guards are worn on the hand and kids often transfer the habit from sucking the thumb to sucking a finger, or to chewing on the thumb guard. The key to breaking the habit is first understanding that it is an “oral fixation,” not just a desire to suck on the thumb or fingers.

(chronic) thumb sucking - ThumbGuard™ (TGuard™). Though the general concept of covering the thumb (or fingers) has been tried in the past, our attempts to refine the fastening system and the thumb cover itself were very successful. This patented concept was finalized into a treatment kit based on the proven fact that most habits, including sucking thumbs or fingers, can be broken if it not exercised for at least 3 weeks.
